DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-7, 8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In order for the claimed invention to be statutory subject matter, the claimed invention must fall within one of the statutory classes of invention as set forth in § 101 (i.e. a process, machine, manufacture, or composition of matter).

In the present case, claim 1 is directed to a “method for analyzing business data”, which is not within one of the classes of invention set forth in § 101.

The “method for analyzing business data” comprising the steps of “(a) identifying a key performance indicator – (e) transmitting the value of the key performance indicator to a contextual visualization interface” as claimed, are merely an abstract idea and do not produce a useful, tangible, concrete results.

The “method for analyzing business data” comprising the steps of (a)-(e) as shown are merely an abstract idea and does not reduce to a practical application in the Technological arts (involving computer or electronic network) and are therefore are found to be non-statutory.

Claim 8, “A system for analyzing and presenting business data”, which comprises two major elements “a contextual visualization interface, a workflow manager” as shown, are merely elements containing abstract idea and does not reduce to a practical

application in the Technological arts (involving computer or electronic network) and are therefore are found to be non-statutory.

Claim Rejections - 35 USC § 112

3. Claims 1-7 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It's not clear from the specification and Figs. 1-6 how the current steps of claim 1 can be put together to form a method for analyzing business data.

4. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The preamble calls for a method for analyzing business data but the body of the claim fails to show the steps of how to analyze the business data.

5. Claim 8 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It's not clear from the specification and Figs. 1-6 how the current elements of claim 8 can be interpreted and operated together to form a system for analyzing and presenting business data. Moreover, it's not clear what is the scope of the claim.

6. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It's not clear how the two elements as shown on the claim operating together to achieve the scope the claim which is a system for analyzing and presenting business data. There appears no elements deal with how to analyze the business data and then presenting the data.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1. US Patent 6,289,380 discloses network management system using virtual reality techniques to display and simulate navigation to network components.
2. US Patent 2003/0088663 discloses method and apparatus for predictively and graphically administering a network system in a time dimension.
3. Article "Influence ...Rural Sweeden" is cited to teach some relationship between performance indicator and business event.

8. Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, should be directed to the group clerical personnel and not to the examiner. As the official records and applications are located in the clerical section of the examining Tech Center, the clerical personnel can readily provide status information without contacting the examiner. See MPEP 203.08. The Tech Center clerical receptionist number is (703) 308-1113.

In receiving an Office Action, it becomes apparent that certain documents are missing, e. g. copies of references, Forms PTO 1449, PTO-892, etc., requests for copies should be directed to Tech Center 3600 Customer Service at (703) 306-5771, or e-mail CustomerService3600@uspto.gov .

Any inquiry concerning the merits of the examination of the application should be directed to Dean Tan Nguyen at telephone number (703) 308-2053. My work schedule is normally Monday through Friday from 7:00 am through 4:30 pm.

Should I be unavailable during my normal working hours, my supervisor John Weiss may be reached at (703) 308-2702. The FAX phone numbers for formal communications concerning this application are (703) 872-9306. Informal communications may be made, following a telephone call to the examiner, by an informal FAX number to be given.
